

# Athithi Lelo Dava

(Theme: Travel & Tourism)

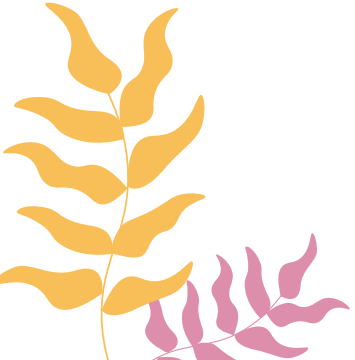

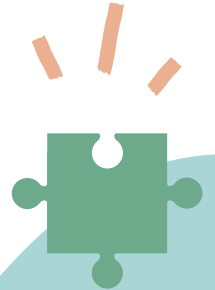

Team  
**Gharwale**

# Problem Statement

**India** holds advantage as a **medical tourism destination** due to **quality** services at **affordable cost** and a vast supply of qualified English speaking doctors. Top-of-the-line medical and diagnostic equipment from global international conglomerates are available at many Indian hospitals.

*To boost medical tourism in India, **there is a requirement of a centralised platform** to connect Hospitals with travel agencies that offer personalised tourist packages..*

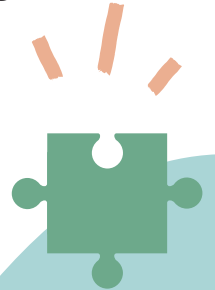

# Abstract

Medical tourism is a term used to describe the practice of travelling across international borders to seek healthcare services.

***Athithi Lelo Dava*** enables medical tourists arriving in India to **experience India's culture and heritage to the fullest, all while being mindful of them being patients undergoing medical care.**

This sector in India is booming, given the affordability of treatment. What if we could leverage this unique up-and-coming market to **boost the country's cultural tourism?**

This is precisely what ALD does. It connects patients and hospitals with travel agencies.
